

Alice Bevan–McGregor

Personal Information

Mailing Address	Apt. 1610, 1025 Rue Sherbrooke Est. Montréal, Québec H2L 1L4
Phone	438 998-2278
E-Mail	alice@gothcandy.com
Date of Birth	September 21st, 1984
I Grok	Standard Internet <i>client</i> / <i>server</i> Protocols, Linux, Nginx, HTML5, Web Development, Systems Administration, Python, e-commerce, CMS, Information Security, Relational & NoSQL Database Administration, Cloud Computing, Local, Networked, and Distributed Filesystems, Automation, Unit & Integration Testing, High Performance, Modularity, and Simplicity

Skills

Operating Systems	UNIX (Linux, <i>advanced</i> , 14 years; Mac, <i>advanced</i> , 20 years), Microsoft Windows (<i>advanced</i> , 18 years), Embedded M68K & ARM (<i>intermediate</i> , 4 years)
Languages	Python (<i>expert</i> , 8 years), JavaScript (<i>expert</i> , 12 years), PHP (<i>proficient</i> , 5 years), C (<i>proficient</i> , 7 years), Perl (<i>proficient</i> , 5 years), Pascal (<i>intermediate</i> , 6 years), Shell Script (BASH/Zsh, <i>advanced</i> , 8 years)
Markup	HTML, XML, and JSON (<i>expert</i>), CSS/LESS (<i>advanced</i>), TEX TEX(<i>proficient</i>), Markdown-like (<i>advanced</i>)
Query Languages	SQL (MySQL, <i>advanced</i> , 8 years; PostgreSQL, <i>intermediate</i> , 4 years), MongoDB Map–Reduce (<i>proficient</i> , 3 years), High-Performance Queues (<i>proficient</i> , 3 years)

Projects Gave presentations (ConFoo) and sat on a roundtable discussion (PyCon) covering topics such as:

- The Python Web Server Gateway Interface
- The WebCore Web Framework
- The Security of Applications and Systems

Marrow
2011–Present A broad-spectrum collection of packages to solve many needs.
Python, Multi-Platform, Architect
Includes a highly performant HTTP/1.1 server, Request/Response abstractions, unified template engine interface, and more.

WebCore
2008–Present A highly performant modular web framework.
Python, Multi-Platform

Marrow Mailer 2006–Present	Highly performant MIME abstraction and e-mail delivery framework. <i>Python, Multi-Platform, Open-Sourced Commercial Component</i>
Raven3D 1997	Software rendered 3D engine. <i>C, DOS</i>
NetLED 1999–2000	Hardware monitoring of network interfaces. <i>C, Linux</i>
CardFile 1993	Contact management software for individuals and SMBs. <i>Clarion, MS-DOS</i>

Employment

2012–Now	matchFWD, a division of Illico Hodes Software developer at a social job search and recruiting tool startup.
2011–2012	Le Site Inc. <i>Chief Framework Architect</i> Helped develop an official Facebook game for a television property. Also developed a software systems restructuring that was estimated to save \$40,000 per year in infrastructure costs.
2000–Now	Top Floor Computer Systems Ltd. <i>Contractor</i> I migrated from an initial role as a software developer to both developer and systems administrator of traditional and cloud hosting Top Floor’s clients. Developed web applications for a wide variety of clients in both PHP and Python in every role from developer to designer. We also open sourced several components during this time. Today I maintain a private managed cloud with Git-based automation.
2002	Kopsis Engineering, Inc. <i>Contractor</i> Cleaned the codebase of FAFileMover, removing proprietary interface access and porting to the standard PalmOS API in order to transition to open source as FileCaddy .
1998	Kyhm Consulting, Pty. <i>Sub-Contractor</i> Implemented the natural language date handling code—“ <i>first wednesday of next month</i> ”—for the child-safe school content filter proxy, Raker.
1996–2002	Margin Software, NECTI. <i>Sole Proprietor</i> Developed numerous tools for PalmOS together receiving more than 20,000 downloads per month peak. Negotiated and executed a hardware bundling partnership to include the VFS QuickBack solution on Flash Plus Springboard modules for Handspring handhelds. Additionally, developed high-efficiency file transfer tool, generalized auto-update software, and reverse engineered a proprietary binary protocol to develop a multiplayer game host monitoring tool. Performed on-call technical support and offered tutoring services ranging from general computer usage to advanced internet use.
